ROBOAI HUB

Who we are?

RoboAI Hub is a state-of-the-art training facility dedicated to developing the next generation of robotics and artificial intelligence leaders. We are dedicated to giving our students an immersive, practical, and industry-focused educational experience.

Our Vision

The goal is to become a renowned institution in robotics and AI education, producing innovative problem solvers and industry leaders who will shape the future of technology.

Our Mission

The mission of RoboAI Hub is to empower individuals with the practical knowledge and skills needed to excel in robotics and AI, foster innovation, and preparing them for impactful careers in these dynamic fields.

Our Past & Current **Working Projects** & Achievements

We Creating India's
FirstFemale Marketing Robot (Robonari)

Exciting Robotics Achievement
Unveiled at Science Park,
Jodhpur - July 15, 2016

On September 17th, 160+ girls, with
the help of robots, created an Indian
map at MBM University

Establish a robotic lab in
Jodhpur at Rotary Club's School

Honored by Zee News at the
Digital Rajasthan Event

Who Can Join??

Our robotics course is designed for individuals from diverse backgrounds who are eager to embark on a thrilling journey into robotics. If you fit into any of these categories, you're a perfect match.

College / Graduates Students

Start shaping your career right from college by learning in-demand robotics and AI skills.

College Dropouts / Freelancers

Open to college dropouts and freelancers eager to unlock new career opportunities in robotics and AI.

Job Seekers / Housewife

An excellent opportunity for job seekers looking to enhance their employability and for housewives seeking a fulfilling career change in the realms of robotics and AI.

Educators/Mentors

Empower educators and mentors to inspire the next generation in robotics and AI.

Note – Min. Qualification – 12th

Facilities in our Hub

Where Inovations comes to life

Advanced Robotic workspace

A state-of-the-art robotic playground for hands-on innovation.

Advanced Robotic Tools

Explore the power of cutting-edge robotics tools, like

Expert Instructors

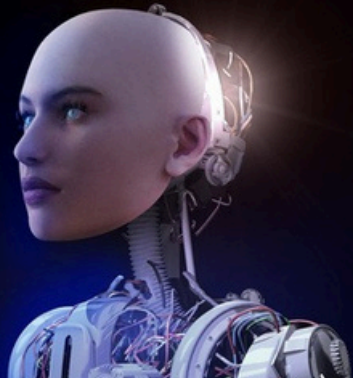

Learn from expert instructors with years of hands-on experience.

Practical Learning Space

Experience hands-on learning in our dedicated practical space.

Transform Your **Learning Experience**

Practical Focus

Learn by Doing

Real World Projects

Solving real industry challenges

Engaging Offline Learning Experience

Working On Ai Models

Building AI Solutions

Why Choose **us?**

Expert Faculty

Learn from industry professionals who are passionate about nurturing your talent.

Multiple Career Opportunities

Unlock multiple career paths, from job placements to starting your own Business.

Exclusive access to Robotic technology

Our curriculum covers a wide spectrum of topics, making you a versatile robotics expert.

Practical Experience

Hands-on practical experience for real-world readiness.

Small class sizes for personalized attention

Benefit from our small class sizes, ensuring personalized guidance and focused learning.

Dear Learner,

Robotics is the present and the future. It is on the rise because no industry can advance without robotics and automation. There are abundant opportunities in the field if you have the right skills. At Roboai Hub we are dedicated to providing comprehensive training with hands-on experience at the forefront. Our mission is to nurture the robotic engineers of the future and equip them with cutting-edge skills. We understand that we are shaping the foundations upon which your robotic career will be built. This is a responsibility we take with the utmost seriousness. Our students are on the brink of launching their careers, and being a part of their development at this crucial stage is a privilege. At Roboai Hub you will always receive top-notch training, supported by real-world projects, practical applications, promising career opportunities, and the latest curriculum. As the proud founder of RoboAi Hub I wish you a successful and thriving career in the field of robotics and automation.

All the best !!

Narayan Jangid
